

NEXTGENERATION EU

Make It Green

Europe is on track to become the first climate-neutral continent by 2050 – we will produce no more greenhouse gases than our ecosystems can naturally absorb. With NextGenerationEU, we will invest in environmentally-friendly technologies, greener vehicles and public transport, and make our buildings and public spaces more energy efficient.

But we also need to protect our natural environment. We will:

- improve water quality in our rivers and seas, reduce waste and plastic products, plant billions of trees and bring back the bees
- create green spaces in our cities and increase the use of renewable energy
- make farming more environmentally-friendly so our food is healthier.

The EU will be leader in climate action, but everyone can do their part by taking public transport or biking, by eating more vegetables and less meat, by buying second hand, recycling and reusing.
