2. Describe the main features of the policy/measure:

The Reading Promotion Programme approved for the period of 2019-2024 was developed by the Ministry of Culture and the Ministry of Education, Science and Sport with the aim to implement national reading promotion policy. Its objective is to develop interest in reading for people of various age groups, including children and infants. Reading Promotion Programme includes measures that aim at developing a positive approach to reading, strengthening reading abilities of schoolchildren and engaging stakeholders of the publishing industry to contribute to reading promotion activities. One of the new measures in this programme is the "Bookstart" model designed for infants. The aim of this model is to introduce books to infants and encourage them to perceive reading as a source of knowledge and different meanings. Some measures in the programme are directed to the part of society that has little or no interest in reading, especially teenagers. Various events are foreseen to increase interest in reading, i.e. "Dads Read for Kids", "Telling the Stories", brain battles related to literacy topics, etc. Reading Promotion Programme will continue reading promotion activities of the similar programme which was implemented in 2006-2011. The survey conducted to evaluate the quality of the former programme, revealed that 84 percent of the respondents had a positive experience with the activities of the programme.
